

## Children/Youth (0-17 yrs.) Treatment Settings: Home - Medicaid Population by RSN.

**Operational Definition:** Percent of child/youth (0-17 yrs) mental health outpatient clients on Medicaid who received services in the home in a Fiscal Year by RSN.

**Operational Measure:** Child/Youth (0-17 yrs) mental health outpatient clients on Medicaid who received services in the home within the Fiscal Year divided by the total number of outpatient recipients on Medicaid in the Fiscal Year.

### Formulas:

Number of Child/Youth (0-17 yrs) mental health outpatient clients on Medicaid who received services in the home in the Fiscal Year by RSN

Number of child/youth (0-17 yrs) on Medicaid receiving community outpatient services in Fiscal Year by RSN

**Discussion:** This indicator shows the percentage of Medicaid enrolled children/youth who received outpatient services in their home, at school, and in other settings outside of the mental health provider agency. The percentage of Medicaid enrolled children/youth being served in these settings has fluctuated across the 3 years.

### Data Notes:

- For penetration rates, a client is counted in the Medicaid served population if they were Medicaid enrolled and received a service at any point during that Fiscal Year. If a client falls on and off of Medicaid eligibility within the same Fiscal Year, they were counted in both the Medicaid and non-Medicaid served populations. Adding the Medicaid and non-Medicaid clients served produces a duplicated count of clients served.
- For the calculation of utilization rates, a service is considered Medicaid funded if the client was Medicaid enrolled at the time the service was delivered. A service is considered non-Medicaid if the client was not enrolled in Medicaid at the time the service was delivered.
- Medicaid enrolled counts are taken from the Mental Health Division (MHD) Ad-Hoc reporting system.
- No changes in data notes and data notes are already included because the indicators are not generated by LGAN and we don't have new data for this year's report.
- A child/youth could receive services in more than one of these settings in a year; therefore, the count across categories are duplicated.
- Age is calculated as of January 1<sup>st</sup> for each Fiscal Year.
- "Healthcare Service Location" in the January 1, 2002 MHD Data Dictionary is used to define service location. Home = 12, School = 19 & 80, Outside Mental Health Provider Agency = 21, 22, 23, 51, 52, 56, 99, 31-34, 61, 50, 71, 72, 54, 55.
- Multiple Healthcare Service Location codes were grouped into Outside Mental Health Provider Agency because the number of people served in each individual location is too small to report on separately.
- RSN counts show the number of unduplicated clients within each RSN (i.e. a person is counted once in each RSN where they receive services).
- The State total is unduplicated across all RSNs (i.e. each person is only counted once in the Statewide total even though they can be counted in more than one RSN).
